# Mashups

Demmy

1. Doggy Doggy Love

- It's an app for helping dogs in estrus to find spouses for breeding the next generation.

- When the dog into estrus, people often need to go to the pet store to ask the staff to help find a dog to mate. This application is to show dogs(which are also in estrus) around your dog on Google Map, and it includes the contact information of the owner (you have to sign up an account and upload your contact information to the server).
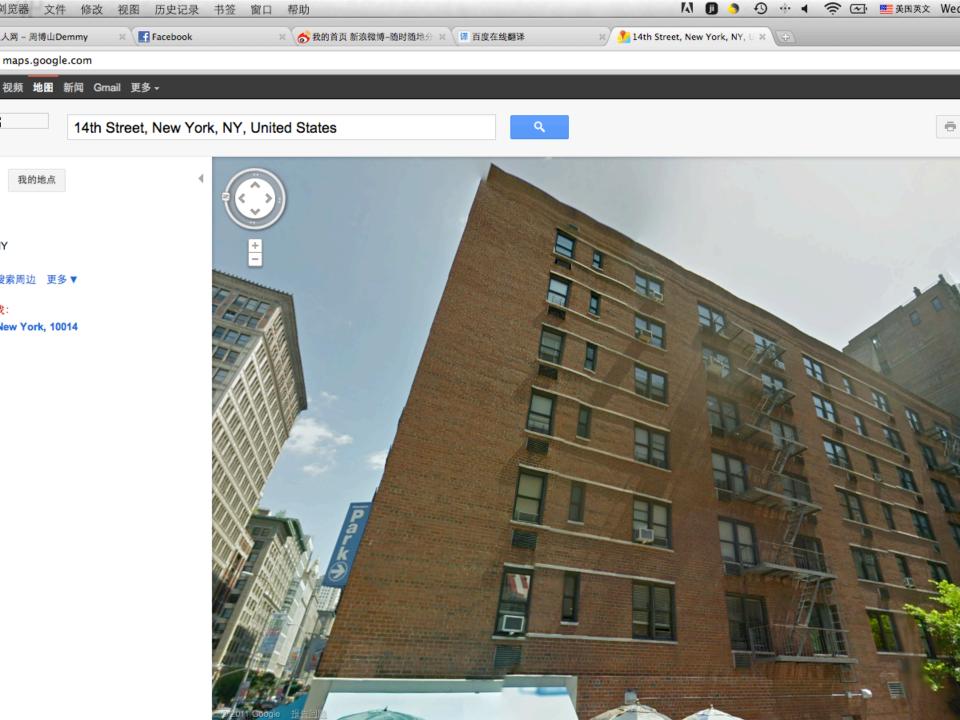

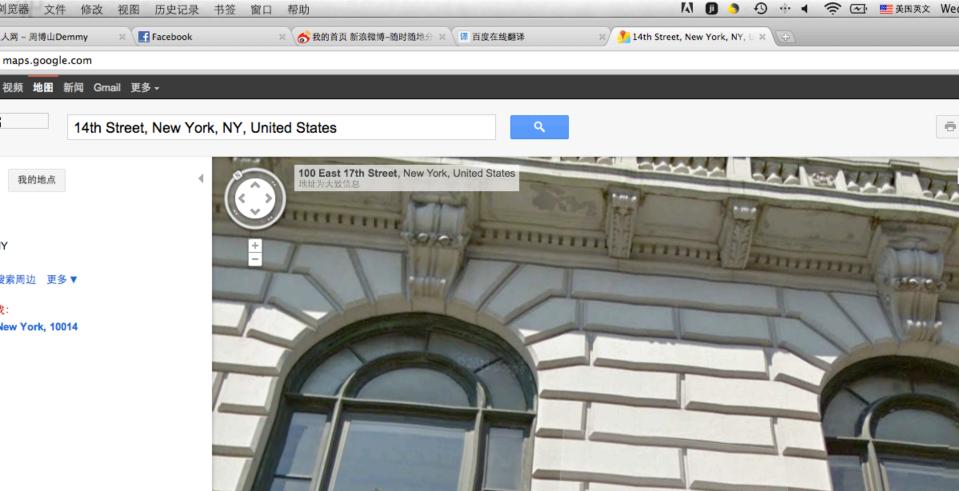

It's more convenient than searching on the Internet. This eliminates the need to ask an agency to find companion pet for our dogs. It saves money, and it is good to our dogs, it is good for the dogs' raising up seed.
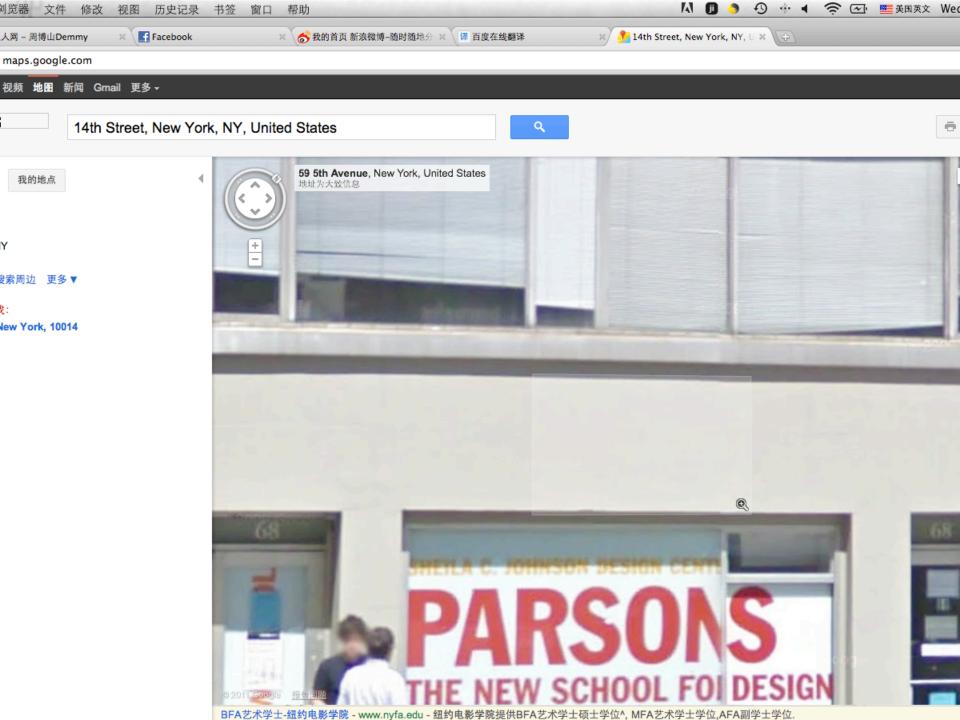

2. Safe graffiti

This software is used Google Map to draw graffiti.

- By using Google Map, we could see very specific photos of a place or even a wall, just like we are there. And we could use Wii to draw graffiti on it, on the walls we want to draw.

- For some places and some walls, it is hard to draw there (because of the location and the safety concerning), but by using this software, we could use Google Map to find the place and the wall, we could draw graffiti on it from any angle. We could even draw graffiti on cars.

BFA艺术学士-纽约电影学院 - www.nyfa.edu - 纽约电影学院提供BFA艺术学士硕士学位^, MFA艺术学士学位,AFA副学士学位.

We will use Wii to draw it, just like we hold a graffiti tool, and we could choose different colors and patterns to draw our graffiti. It's more convenient.

On the other hand, we draw graffiti in this way is more environmental friendly and more safe.

We could save and share our graffiti project with our friends by log in our Google account.

Feedback Loop

Midi-based Video Controller beta 1.0

Using midi signals to control video playback, and add some effect on it.

When we play different keys on our midi keyboard, it will shows different parts of the video.

Each notes on our midi keyboard represents and controls different unique parts of the video.

We could control and affect the video by playing notes/ playing music on our midi keyboard.
